Metro Bucarest - Romania

The Bucharest underground (Metroul din Bucureşti in Romanian) is the fastest and most used mean of public transport, to connect far districts of the capital of Romania.

The network is managed by the company Metrorex and carries 600,000 passengers a day. The network is 70 km long with 51 stations that cross the city.

Imequadri Duestelle, has supplied the electrical panels for the modernization and expansion of the underground network for urban stations:
S / S MILITARY ACADEMY, S / S PARC Drumul,

The supply includes:
30 compartments of Low Voltage Switchboards and 40 compartments of Medium Voltage Switchboards (1600A-24kV 16kA).
